PRODUCT TECHNICAL SPECIFICATION

Product: Texoflex Combi

Material:

Texoflex Combi is a flexible duct distinguished by its hardness, high flexibility and extremely strong multi-layer walls and it is designed for various application fields. The duct is made of multi-layer polyester laminated aluminum and PVC foil reinforced with high tension steel wire. Due to its exceptional flexibility can be easy installed to round and oval connectors.

Application:

Texoflex Combi is made for low and medium pressure ventilation systems.

Product construction:

The product Flexible duct „Texoflex Black Combi C21B“ include the following components:

Number of layers: 3

- 1 Layer of 7 µm Aluminium
- 2 Layer of 12 µm Polyester (one is metalized)
- 1 Layer of 90 µm PVC Embossed Black
- Steel wire

Properties:

Good flexibility
Good compression

Specification:

Temperature range: from -30º C to +140º C,
Diameters: from 82 mm to 508 mm,
Standard length: 10 m.
